

THE **SCOOP** ON SUGAR AND PERFORMANCE

SUGAR = CARBS = ENERGY

HOW:

Sugars are absorbed rapidly and sent to where they're needed (muscles or brain) and quickly converted to energy.

WHY:

Because this type of energy has been shown to help maintain athletic performance with activity that lasts at least 60 minutes.

WHAT:

Muscles rely on fluid and fuel to thrive during activity. Gatorade® Thirst Quencher's 21 grams of carbs per 12 ounces of fluid are tailor-made for efficiency.
